Quality Uncertainty and Perception Lalit Wankhade 2010-06-16 It has been observed that the studies of quality are pursued in various disciplines like economics, quality management, and marketing science, and are seen isolated. The treatments imparted to these studies are also different and has the backdrop of discipline in which the work has been pursued. The nature of isolation is equally seen when quality uncertainty and perceived quality were pursued separately without showing any inkling that these can be complimentary. Economist and Nobel Laureate, Akerlof (1970), wrote a seminal piece “The market for lemons: quality uncertainty and market mechanism”, where he described quality uncertainty due to information asymmetry. It refers to the fact that a party in a transaction may have more information than the other. This is information asymmetry. If the seller has more information than the buyer about the product quality, he/she may sell it, as if it is a high-quality product. In reality, it could be a low-quality product. The buyer does not have the information regarding the quality of the offered product. The market condition that led to this transaction is quality uncertainty due to information asymmetry.

The Future of Business Schools Thomas Durand 2008-01-15 European Business Schools tend to imitate their North American counterparts in an attempt to catch up in the worldwide competition for knowledge creation and training in management. Is this relevant? To what extent do business schools in Europe contribute to competitiveness of the economy? What will be the impact of new technologies, e.g. on executive education? Will there be a European job market for business professors? Will market forces win against state owned universities? The book compares the current institutional setting of business schools in various countries and presents five foresight scenarios for 2020.

Algebraic Geometry and Statistical Learning Theory Sumio Watanabe 2009-08-13 Sure to be influential, Watanabe's book lays the foundations for the use of algebraic geometry in statistical learning theory. Many models/machines are singular: mixture models, neural networks, HMMs, Bayesian networks, stochastic context-free grammars are major examples. The theory achieved here underpins accurate estimation techniques in the presence of singularities.

The HR Scorecard Brian E. Becker 2001-04-11 Three experts in Human Resources introduce a measurement system that convincingly showcases how HR impacts business performance. Drawing from the authors' ongoing study of nearly 3,000 firms, this book describes a seven-step process for embedding HR systems within the firm's overall strategy--what the authors describe as an HR Scorecard--and measuring its activities in terms that line managers and CEOs will find compelling. Analyzing how each element of the HR system can be designed to enhance firm performance and maximize the overall quality of human capital, this important book heralds the emergence of HR as a strategic powerhouse in today's organizations.

Data Mining for Business Intelligence Galit Shmueli 2006-12-11 Learn how to develop models for classification, prediction, and customer segmentation with the help of Data Mining for Business Intelligence In today's world, businesses are becoming more capable of accessing their ideal consumers, and an understanding of data mining contributes to this success. Data Mining for Business Intelligence, which was developed from a course taught at the Massachusetts Institute of Technology's Sloan School of Management, and the University of Maryland's Smith School of Business, uses real data and actual cases to illustrate the applicability of data mining intelligence to the development of successful business models. Featuring XLMiner, the Microsoft Office Excel add-in, this book allows readers to follow along and implement algorithms at their own speed, with a minimal learning curve. In addition, students and practitioners of data mining techniques are presented with hands-on, business-oriented applications. An abundant amount of exercises and examples are provided to motivate learning and understanding. Data Mining for Business Intelligence: Provides both a theoretical and practical understanding of the key methods of classification, prediction, reduction, exploration, and affinity analysis Features a business decision-making context for these key methods Illustrates the application and interpretation of these methods using real business cases and data This book helps readers understand the beneficial relationship that can be established between data mining and smart business practices, and is an excellent learning tool for creating valuable strategies and making wiser business decisions.

Destroyer Kali Altsoba 2020-05-29 The war started with a surprise invasion of Genève system and four other systems barely seventeen hours ago. Already, the Krevan Republic and its small and outdated navy is losing badly. Captain Magda Akiyan is on the run from vastly more powerful enemies in the outer system, hiding behind one of the inner moons of a gas giant. Coms are down, she's outgunned and outnumbered, and she just lost her First Officer and part of her Main Bridge to a petawatt laser that seemed to come out of nowhere. She's only ever captained a single destroyer before today. Now she's in command of what's left of the squadron screen and escort: two old frigates and five ageing destroyers. She's facing an active enemy threat she can't locate with a young, green and scared crew that's barely initiated into combat. And she just had to brevet promote a new First Officer, the brilliant but way too young Ensign Émile Fontaine. Can she save the escort? Can she learn how to fight and win in space, against such long odds? On the ground, Jan Wysocki and Zofia Jablonski are leading a shattered company that's also running from the enemy. They're in the deep forest heading for the only open spaceport, which is already under siege. No one could ever guess that within six months their raggedly little unit will be known to all Orion as "Wysocki's Wreckers." That within a year, it will become the core infantry assault and marine unit assigned to the fateful White Sails fleet. Or that Jan has a personal mission to fulfill. A fate to meet, perhaps even a destiny to reach. How can they know about "The Ghost"? He doesn't even know himself.

Managers Not MBAs Henry Mintzberg 2005-06-02 In this sweeping critique of how managers are educated and how, as a consequence, management is practiced, Henry Mintzberg offers thoughtful and controversial ideas for reforming both. “The MBA trains the wrong people in the wrong ways with the wrong consequences,” Mintzberg writes. “Using the classroom to help develop people already practicing management is a fine idea, but pretending to create managers out of people who have never managed is a sham.” Leaders cannot be created in a classroom. They arise in context. But people who already practice management can significantly improve their effectiveness given the opportunity to learn thoughtfully from their own experience. Mintzberg calls for a more engaging approach to managing and a more reflective approach to management education. He also outlines how business schools can become true schools of management.

The Book of Miso William Shurtleff 2001 From the authors of THE BOOK OF TOFU comes this updated tribute to miso. One of Japan's most beloved foods for over a thousand years, miso is a cultured, high-protein seasoning perfectly at home in recipes within and beyond the boundaries of Asian cuisine. Available in a range of flavors, colors, textures, and aromas as varied as that of the world's fine cheeses and wines, miso makes a delicious addition to stocks, stews, dressings, casseroles, and desserts. With traditional Japanese recipes like Miso Soup with Potato, Wakame, & Tofu; Eggplant with Sesame & Miso Sauce; as well as those more familiar to the Western palate-Tostadas, Quiche Niçoise with Miso, and Boston Baked Soybeans with Brown Rice and Miso-THE BOOK OF MISO offers a bounty of ways to enjoy this wonderfully healthful seasoning. Over 400 tempting recipes accompanied by more than 300 illustrations.

Corporate Transformation Alessandro Sinatra 2012-10-10 by Professor Alessandro Sinatra xi There are two categories which divide academic writing. The first category is made up of those which gather and systemize a developed thought, while the second is made up of those which detail a learning process which is presently occurring. This book belongs to the second category. It is intended to offer evidence of a still continuing research process which began three years ago. This research, undertaken simultaneously in Europe, the United States and Japan, has provided interesting evidence as to the conditions which must be present within a company in order to ensure continuous change. The object of our research has been to galvanize academics and managers into a debate which is especially relevant today: that of the ability of a company to anticipate or respond to changes which are occurring in its environment. Today more than ever, the ability to change culture and organizational structure are conditions which ensure a company's success, or more often, permit its survival. This book offers ten case studies about ten different large international firms, and about how they approached the problem of strategic change. In addition, there are ten articles which analyze the empirical evidence presented in the cases, and which try to provide and develop a general framework which can be used in a variety of situations. The cases represent an empirical base of reference. For the manager, they can serve as a source of benchmarking with the present situation of her/his company.

Work and Motivation Victor Harold Vroom 1964 Why do people choose the careers they do? What factors cause people to be satisfied with their work? No single work did more to make concepts like motive, goal incentive, and attitude part of the workplace vocabulary. This landmark work, originally published in 1964, integrates the work of hundreds of researchers in individual workplace behavior to explain choice of work, job satisfaction, and job performance. Includes an extensive new introduction that highlights and updates his model for current organization behavior educators and students, as well as professionals who must extract the highest levels of productivity from today's downsized workforces.
