Dimensionalizing Cultures: The Hofstede Model in Context

British anthropologist Mary Douglas (1973) proposed a two-dimensional ordering of ways of looking at the world: 1. ‘Group’ or inclusion - the claim of groups over members, and 2. ‘Grid’ or classification - the degree to which interaction is subject to rules. Douglas saw these categories as relating to a wide variety of beliefs and social actions:

The Theory of Multiple Intelligences - Howard Gardner

of psychometric instruments. Rather, he drew upon research findings from evolutionary biology, neuroscience, anthropology, psychometrics and psychological studies of prodigies and savants. Through synthesis of relevant research across these fields, Gardner established several criteria for identification of a unique intelligence (see Table 1).

Competing Paradigms in Qualitative Research

way in which the facts needed to test them are collected. But it now seems established beyond objection that theories and facts are quite interdependent—that is, that facts are facts only within some theoretical framework. Thus a fundamental assumption of the received view is exposed as dubious. If hypotheses and observations are not independent,

Theories and Frameworks for Online Education: Seeking an

Theories and Frameworks for Online Education: Seeking an Integrated Model 170 1. Gain attention: Use media relevant to the topic. 2. Describe the goal: Provide clear objectives to the overall course goals. 3. Stimulate prior knowledge: Review previously presented material and concepts and connect them to the material to be addressed in the current module.
