the spherical azimuthal coordinate. In this edition all three systems (plane polar, cylindrical, spherical) use  $\phi$  as  $\phi = \tan^{-1}(y/x)$ . In line integrals it is common to use  $ds$  for an element of length, and many authors will use  $dS$  for an element of area. I have tried to avoid this confusion by sticking to  $d\ell$  and  $dA$  respectively (with rare ...
