Identifying, Assessing, and Treating ADHD at School Stephen E. Brock 2009-08-07 ADHD is the most commonly diagnosed childhood behavioral disorder. Moreover, many students receiving special education assistance are reported to have ADHD. Children with ADHD may experience significant school adjustment difficulties and achievement problems. Problem behaviors associated with attention deficits and hyperactivity often have a negative impact on the classroom, and, therefore, may compromise the learning environment for many, if not all, students. There is a critical need for school professionals to identify, assess, and treat students with ADHD. Identifying, Assessing, and Treating ADHD at School brings science to practice, providing school professionals invaluable information to meet the needs of children with ADHD. This volume, designed as a practical, easy-to-use reference for school psychologists and other mental health and educational professionals: Explains why school psychologists and their colleagues need to be prepared and able to identify and serve students with ADHD. Identifies the prevalence, influences, and associated conditions. Provides a review of screening, referral, and diagnostic assessment processes. Offers guidance on conducting psychoeducational assessments. Reviews evidence-based treatments. Offers practical guidance on setting up programs that address individual and classroom issues. School psychologists and other education and mental health professionals will find Identifying, Assessing, and Treating ADHD at School an exceptional resource in working to enhance the mental health and academic development of students.

Spiritual Warfare Karl I. Payne 2021-03 The Bible is clear that we face three different types of opposition while attempting to successfully navigate life as Ambassadors for Christ. Our opposition is identified in Scripture as "the world" (1 John 2:15-17), "the flesh" (Romans 7:15-25), and "the devil" (1 Peter 5:8-9). The sad reality is that too many Christians lose more battles than they win and endure their walk with God rather than enjoy it because they often don't recognize how opposition through spiritual warfare actually works. More importantly, they have no idea how to effectively and efficiently respond to these attacks. Scripture nowhere indicates that a wish, a hope, a cliché, or a sincere guess represent adequate responses to attacks from these three very real enemies. Christians must be strategic in their responses to these clearly defined enemies, learning how to fight biblically rather than just sincerely. In *Spiritual Warfare*, Dr. Karl Payne-- pastor of Leadership Development and Discipleship at Antioch Bible Church and former Chaplain for the NFL's Seattle Seahawks-- has written a guidebook for recognizing and responding to spiritual warfare that is simple, biblical, and transferable. Pragmatically speaking, the materials in this book are biblically sound, battle tested, and they work. As Christians we are supposed to live life as victors, not victims. It is past time we learn how to consistently walk our talk in the midst of conflict rather than passively sing songs or daydream about courageous Christian living.

Interactive Technologies for Autism Julie A. Kientz 2013-11-01 Development, deployment, and evaluation of interactive technologies for individuals with autism have been rapidly increasing over the last decade. There is great promise for the use of these types of technologies to enrich interventions, facilitate communication, and support data collection. Emerging technologies in this area also have the potential to enhance assessment and diagnosis of individuals with autism, to understand the nature of autism, and to help researchers conduct basic and applied research. This book provides an in-depth review of the historical and state-of-the-art use of technology by and for individuals with autism. The intention is to give readers a comprehensive background in order to understand what has been done and what promises and challenges lie ahead. By providing a classification scheme and general review, this book can also help technology designers and researchers better understand what technologies have been successful, what problems remain open, and where innovations can further address challenges and opportunities for individuals with autism and the variety of stakeholders connected to them.

Inelastic Analysis of Solids and Structures M. Kojic 2006-03-30 Inelastic Analysis of Solids and Structures presents in a unified manner the physical and theoretical background of inelastic material models and computational methods, and illustrates the behavior of the models in typical engineering conditions. The book describes experimental observations and principles of mechanics, and efficient computational algorithms for stress calculations as typically performed in finite element analysis. The theoretical background is given to an extent necessary to describe the commonly employed material models in metal isotropic and orthotropic plasticity, thermoplasticity and viscoplasticity, and the plasticity of geological materials. The computational algorithms are developed in a unified manner with some detailed derivations of the algorithmic relations. Many solved examples are presented, which are designed to give insight into the material behavior in various engineering conditions, and to demonstrate the application of the computational algorithms.

Kissing Architecture Sylvia Lavin 2011-05-09 Kissing Architecture explores the mutual attraction between architecture and other forms of contemporary art. In this fresh, insightful, and beautifully illustrated book, renowned architectural critic and scholar Sylvia Lavin develops the concept of "kissing" to describe the growing intimacy between architecture and new types of art--particularly multimedia installations that take place in and on the surfaces of buildings--and to capture the sensual charge that is being designed and built into architectural surfaces and interior spaces today. Initiating readers into the guilty pleasures of architecture that abandons the narrow focus on function, Lavin looks at recent work by Pipilotti Rist, Doug Aitken, the firm Diller Scofidio + Renfro, and others who choose instead to embrace the viewer in powerful affects and visual and sensory atmospheres. Kissing Architecture is the first book in a cutting-edge new series of short, focused arguments written by leading critics, historians, theorists, and practitioners from the world of urban development and contemporary architecture and design. These books are intended to spark vigorous debate. They stake out the positions that will help shape the architecture and urbanism of tomorrow. Addressing one of the most spectacular and significant developments in the current cultural scene, Kissing Architecture is an entertainingly irreverent and disarmingly incisive book that offers an entirely new way of seeing--and experiencing--architecture in the age after representation.

Environmental Chemistry, Eighth Edition Stanley E. Manahan 2004-08-26 Environmental Chemistry, Eighth Edition builds on the same organizational structure validated in previous editions to systematically develop the principles, tools, and techniques of environmental chemistry to provide students and professionals with a clear understanding of the science and its applications. Revised and updated since the publication of the best-selling Seventh Edition, this text continues to emphasize the major concepts essential to the practice of environmental science, technology, and chemistry while introducing the newest innovations to the field. The author provides clear explanations to important concepts such as the anthrosphere, industrial ecosystems, geochemistry, aquatic chemistry, and atmospheric chemistry, including the study of ozone-depleting chlorofluorocarbons. The subject of industrial chemistry and energy resources is supported by pertinent topics in recycling and hazardous waste. Several chapters review environmental biochemistry and toxicology, and the final chapters describe analytical methods for measuring chemical and biological waste. New features in this edition include: enhanced coverage of chemical fate and transport; industrial ecology, particularly how it is integrated with green chemistry; conservation principles and recent accomplishments in sustainable chemical science and technology; a new chapter addressing terrorism and threats to the environment; and the use of real world examples.

International Public Procurement Roberto Hernández García 2009 Public procurement rules are intended to ensure the best terms for government and the adequate protection of suppliers and contractors who sell their goods and services to the State. This practical title is particularly timely given the evolution and improvement in public procurement regimes in many jurisdictions. This unique title contains contributions from leading experts around the world who explain the best practice in public procurement in their jurisdictions. In addition to 19 jurisdictional chapters by leading professionals, featured chapters include contributions on United Nations best practice, the European directives, how countries are fighting corruption in the field and how PPP projects are procured. Legal advisers, government officers, consultants and academics will find the book useful in providing practical ideas regarding how best practices have been implemented in different jurisdictions and the results of such implementation.

SOS Help for Parents Lynn Clark 1996-01-01 This second edition of "SOS" provides parents with guidance for handling a variety of common behavior problems based on the behavior approach to child rearing and discipline. This approach suggests that good and bad behavior are both learned and can be changed, and proposes specific methods, skills, procedures, and strategies for parents to use in getting improved behavior from their children. The guide is divided

into four sections. Section 1 presents some fundamentals of child behavior and effective discipline. Some of the causes of children's misbehavior are examined as well as ways of increasing good behavior and eliminating bad ones. Section 2 provides advice for implementing the "time-out" method. Section 3 gives suggestions on how to: (1) manage bad behavior away from home; (2) use points, tokens, and contracts; (3) use time-out on two children at the same time; (4) use time-out on a toy instead of the child; (5) handle aggressive and dangerous behavior; and (6) help children express feelings. Section 4 suggests some additional resources for helping children. Each chapter includes a review of the most important ideas and instructions presented. The book's two appendices include an index of problem behaviors, quizzes and answers for parents, more resources for professionals, and tear-out sheets for parents and teachers. Approximately 60 references are included. A videotape, not available from ERIC, demonstrates the child-rearing rules, and errors to avoid, as well as other child management methods. A printed "Video Leader's Guide" for the training leaders provides objectives, suggested outlines for workshops, and guidelines for discussing the behavior vignettes in the video. Workshop evaluation forms and handouts are appended. A parent audio cassette on how to use "time out" effectively is also part of this multimedia package. (HTH)

Introduction to Tumor Biology I. De Wever 1999 This book offers clinical oncologists an introduction to some selected topics of tumor biology where important progress has been made during the last decade. The concept is rather unique because it combines advances in clinical pathology, genetics, molecular oncology and immunology. The first two chapters deal with the genetic and molecular basis of malignant transformation on cellular level: DNA damage, mutations and repair mechanisms, oncogenes and tumor suppressor genes. The growth of a tumor cell population depends not only on cell division, but also on deregulation of apoptosis (chapter 3). Most clinical tumors are characterized by heterogeneity caused by different degrees of differentiation in different cell clones as illustrated for soft tissue tumors in chapter 4. The following chapters explain the multistep process of local tumor progression in gastro-intestinal cancers and malignant melanoma. Cellular and molecular aspects of metastases are dealt with in chapter 7. But host cells react to tumor cells and specific T-cell defined antigens offer a perspective for cancer vaccine development as reviewed in the last chapter. The book is timely because new diagnostic and therapeutic applications based on molecular oncology will reach the clinic at ever increasing pace.

Immunobiology of Organ Transplantation David S. Wilkes 2012-12-06 Currently, individuals interested in seeking an in-depth discussion of transplantation immunology must seek individual articles published in several journals, or extrapolate information from various non-transplant immunology textbooks. The purpose of this text is to provide the reader with a single source of information for the basic science of immunobiology of organ transplantation. It is unique that it focuses on immunobiology from the basic research side, with an emphasis on the cellular and molecular levels. The readers will be physicians, scientists, and graduate students interested and engaged in the study of immunology as it relates to allo- and xenotransplantation. This book is designed to be the reference standard for the immunobiology of transplantation.

Investigative Journalism in China David Bandurski 2010-06-01 Despite persistent pressure from state censors and other tools of political control, investigative journalism has flourished in China over the last decade. This volume offers a comprehensive, first-hand look at investigative journalism in China, including insider accounts from reporters behind some of China's top stories in recent years. While many outsiders hold on to the stereotype of Chinese journalists as docile, subservient Party hacks, a number of brave Chinese reporters have exposed corruption and official misconduct with striking ingenuity and often at considerable personal sacrifice. Subjects have included officials pilfering state funds, directors of public charities pocketing private donations, businesses fleecing unsuspecting consumers - even the misdeeds of journalists themselves. These case studies address critical issues of commercialization of the media, the development of ethical journalism practices, the rising specter of "news blackmail," negotiating China's mystifying bureaucracy, the dangers of libel suits, and how political pressures impact different stories. During fellowships at the Journalism & Media Studies Centre of the University of Hong Kong, these narratives and other background materials were fact-checked and edited by JMSC staff to address critical issues related to the media transitions currently under way in the PRC. This engaging narrative gives readers a vivid sense of how journalism is practiced in China. --David Bandurski is a scholar at the University of Hong Kong's China Media Project, a research and fellowship initiative of the Journalism & Media Studies Centre. Martin Hala has taught journalism at the Universities in Prague and Bratislava.

Six Questions of Socrates: A Modern-Day Journey of Discovery through World Philosophy Christopher Phillips 2011-01-17 How people around the world grapple with the great questions posed by Socrates. What is virtue? What is moderation? What is justice? What is courage? What is good? What is piety? Socrates thought that understanding the perspectives of others on these six great questions would help him become a more excellent human being. Following in Socrates's footsteps, Christopher Phillips--"Johnny Appleseed with a master's degree" (Utne Reader)--investigates these same questions, beginning in the marketplace of modern-day Athens. He goes on to investigate the timely responses and outlooks of people from different cultures and backgrounds around the world: from Greece and Spain to Japan and Korea, Mexico City, and Chiapas, where the region's indigenous people struggle for fundamental human rights. Phillips also traveled throughout the United States, holding dialogues in diverse communities from New York City to the Navajo Nation. Introducing us to less familiar thinkers in non-Western traditions who were kindred spirits of Socrates, Phillips enlarges our perspectives on life's fundamental questions, creating an innovative world survey of philosophy.

Social Problems Lorne Tepperman 2007 This is a core text for courses in social problems. Using a strong Canadian perspective, it examines the social dynamics and consequences of social problems (such as unemployment, poverty, global inequality) through the lens of the main sociological paradigms. It takes a broad approach and examines the social construction of social problems and the impact of social problems on individual and societal health. Possible solutions for individuals and society at large are examined.

Hormone Replacement Therapy Sally Hope 1999 This small, focused book gives an evidence-based approach to the current data on the often bewildering profusion of hormone replacement therapy preparations, and the emerging research trials on the risks and benefits of HRT.
