Six Questions of Socrates: A Modern-Day Journey of

Discovery through World Philosophy Christopher Phillips 2011-01-17 How people around the world grapple with the great questions posed by Socrates. What is virtue? What is moderation? What is justice? What is courage? What is good? What is piety? Socrates thought that understanding the perspectives of others on these six great questions would help him become a more excellent human being. Following in Socrates's footsteps, Christopher Phillips—"Johnny Appleseed with a master's degree" (Utne Reader)—investigates these same questions, beginning in the marketplace of modern-day Athens. He goes on to investigate the timely responses and outlooks of people from different cultures and backgrounds around the world: from Greece and Spain to Japan and Korea, Mexico City, and Chiapas, where the region's indigenous people struggle for fundamental human rights. Phillips also traveled throughout the United States, holding dialogues in diverse communities from New York City to the Navajo Nation. Introducing us to less familiar thinkers in non-Western traditions who were kindred spirits of Socrates, Phillips enlarges our perspectives on life's fundamental questions, creating an innovative world survey of philosophy.

Linguistic Evidence Stephan Kepser 2005-01-01 The renaissance of corpus linguistics and promising developments in experimental linguistic techniques in recent years have led to a remarkable revival of interest in issues of the empirical base of linguistic theory in general, and the status of different kinds of linguistic evidence in particular. Consensus is growing (a) that even so-called primary data (from introspection as well as authentic language production) are inherently complex performance data only indirectly reflecting the subject of linguistic theory, (b) that for an appropriate foundation of linguistic theories evidence from different sources such as introspective data, corpus data, data from (psycho-)linguistic experiments, historical and diachronic data, typological data, neurolinguistic data and language learning data are not only welcome but also often necessary. It is in particular by contrasting evidence from different sources with respect to particular research questions that we may gain a deeper understanding of the status and quality of the individual types of linguistic evidence on the one hand, and of their mutual relationship and respective weight on the other. The present volume is a collection of (selected) papers presented at the conference on 'Linguistic Evidence' in Tübingen 2004, which was explicitly devoted to the above issues. All of them address these issues in relation to specific linguistic research problems, thereby helping to establish a better understanding of the nature of linguistic evidence in particularly insightful ways.

Spiritual Warfare Karl I. Payne 2021-03 The Bible is clear that we face three different types of opposition while attempting to successfully navigate life as Ambassadors for Christ. Our opposition is identified in Scripture as "the world" (1 John 2:15-17), "the flesh" (Romans 7:15-25), and "the devil" (1 Peter 5:8-9). The sad reality is that too many Christians lose more battles than they win and endure their walk with God rather than enjoy it because they often don't recognize how opposition through spiritual warfare actually works. More importantly, they have no idea how to effectively and efficiently respond to these attacks. Scripture nowhere indicates that a wish, a hope, a cliché, or a sincere guess represent adequate responses to attacks from these three very real enemies. Christians must be strategic in their responses to these clearly defined enemies, learning how to fight biblically rather than just sincerely. In *Spiritual Warfare*, Dr. Karl Payne-- pastor of Leadership Development and Discipleship at Antioch Bible Church and former Chaplain for the NFL's Seattle Seahawks-- has written a guidebook for recognizing and responding to spiritual warfare that is simple, biblical, and transferable. Pragmatically speaking, the materials in this book are biblically sound, battle tested, and they work. As Christians we are supposed to live life as victors, not victims. It is past time we learn how to consistently walk our talk in the midst of conflict rather than passively sing songs or daydream about courageous Christian living.

Architecture of Topic Valéria Molnár 2019-08-19 This volume contains innovative papers that target the linguistic status of topic at the interface between grammar and discourse. The purpose of the volume is to discuss the universal properties of topics and, at the same time, to document the range of discourse-semantic and grammatical variation within this phenomenon in European languages. The volume is structured accordingly: (i) theoretical foundations of topicality in grammar and discourse; (ii) discourse-semantic correlates of topicality; (iii) variation in the

grammatical (external and internal) encoding of topicality; (iv) topics from the diachronic perspective. The articles take different perspectives, including contrastive studies of modern languages, studies on diachronic development, and typological generalizations. They also take into consideration various types of empirical data – introspective data, semi-spontaneously produced data, experimental data and language corpora. The articles in this volume show that the concept of topic is necessary for the description and explanation of a number of discourse-semantic phenomena. They present a state of the art account of the architecture of topic while making recent research on the phenomenon accessible to a wider readership.

Topicalization and Stress Clash Avoidance in the History of English Augustin Speyer 2010 "The book is concerned with the interaction of syntax, information structure and prosody in the history of English, demonstrating this with a case study of object topicalization. The approach is data-oriented, using material from syntactically parsed digital corpora of Old, Middle and Early Modern English, which serve as a solid foundation for conclusions. The use of object topicalization underwent a sharp decline from Old English until today. In the present volume, a basic prosodic well-formedness condition, the Clash Avoidance Requirement, is identified as the main factor for this change. With the loss of V2-syntax, object topicalization led more easily to cases in which two focalized phrases, the topicalized object and the subject, are adjacent. The two focal accents on these phrases would produce a clash, thus violating the Clash Avoidance Requirement. In order to circumvent this, the use of topicalization in critical cases is avoided. The Clash Avoidance Requirement is highly relevant also today, as experimental data on English and German show. Further, the Clash Avoidance Requirement helps to explain the well-known syntactic structure of the left periphery in Old English. An analysis positing two subject positions is defended in the study. The variation of these subject positions is shown to depend not on pronominal vs. lexical status of the subject but on information structural properties."-- Publisher's website.

Transmorphing Utopia 2017-03-20 Transmorphing Utopia is the first major publication on the astutely absurd work of artist Paul W. Waddell. This richly illustrated book includes essays by independent curator Santiago Vernetti and celebrated author Jonathan Griffin, as well as an exclusive interview between Waddell and the artist Chelsea Coon. The texts offer generous insights into the full scope and depth of Waddell's career across his varied mediums and disciplines. The full color reproductions bring together images from two seminal series of painting: LOOSE HEADS (paintings that look for you) and TRANSMORPHING. Vernetti's essay, which is chock-full of his characteristically refreshing wit, deftly situates these paintings within their appropriate art historical lineage while offering amusingly perceptive interpretations. Griffin's personal reflection untangles the various strands of Waddell's oeuvre, and considers what artistic personas the artist adopts when addressing his audience. The interview between Coon and Waddell, two of the most engaging and exciting figures in the contemporary art scene, lays bare the impulses and influences that drive and inform their performance practices. Despite its content and contributors, this publication just barely scratches the surface of one of Southern California's most intriguing artists, and will leave readers delightfully unquenched.
