Daniel James Webb Daniel James Webb 2011-12 LATE NIGHT, EARLY MOURN-ING SAT-HER-DAY I wrote this book of "prose n poems" after I moved to Cape Cod to take a job n live by the ocean after leaving the Maine-lands with 7 years of bar hoping, basket passing coffee houses, walking the cobblestone parking lot of Portland, Maine where I saw poetry in motion three hundred and sixty five days per year and I walked naked and flowing in the moment all over that beautiful city. Of course it takes true happiness to write happy and snappy and low down blues to play this game. "DANIEL JAMES WEBB" is a book of poems n prose n journal-eskkk freight train rambles. It stars the true American boy as our narrator and through his experiences and visions and illuminations, we walk across American culture where it belongs, in the mind of a sharp, cynical, angry, mad, existing poet of the mountains. This blue book blows bugles n balcony riddles, crying in the midnight moonlight trying for so many years to please the paper, the people, the mind, the love struck poet in Cape Cod puddles, babe, drunk without worry or wicked sins deep down in six feet of ground, boy, cause I've got a woman I can love. Lord, Lord, tell the whole world what I can do! I've been so wild baby! It seems the talk's all over town -Daniel James Webb Cape Cod, Ma

Smaller Faster Lighter Denser Cheaper Robert Bryce 2014-05-13 In the face of today's environmental and economic challenges, doomsayers preach that the only way to stave off disaster is for humans to reverse course: to de-industrialize, re-localize, ban the use of modern energy sources, and forswear prosperity. But in this provocative and optimistic rebuke to the catastrophists, Robert Bryce shows how innovation and the inexorable human desire to make things Smaller Faster Lighter Denser Cheaper is providing consumers with Cheaper and more abundant energy, Faster computing, Lighter vehicles, and myriad other goods. That same desire is fostering unprecedented prosperity, greater liberty, and yes, better environmental protection. Utilizing on-the-ground reporting from Ottawa to Panama City and Pittsburgh to Bakersfield, Bryce shows how we have, for centuries, been pushing for Smaller Faster solutions to our problems. From the vacuum tube, mass-produced fertilizer, and the printing press to mobile phones, nanotech, and advanced drill rigs, Bryce demonstrates how cutting-edge companies and breakthrough technologies have created a world in which people are living longer, freer, healthier, lives than at any time in human history. The push toward Smaller Faster Lighter Denser Cheaper is happening across multiple sectors. Bryce profiles innovative individuals and companies, from long-established ones like Ford and Intel to upstarts like Aquion Energy and Khan Academy. And he zeroes in on the energy industry, proving that the future belongs to the high power density sources that can provide the enormous quantities of energy the world demands. The catastrophists have been wrong since the days of Thomas Malthus. This is the time to embrace the innovators and businesses all over the world who are making things Smaller Faster Lighter Denser Cheaper.

Survivor Song Paul Tremblay 2020-07-07 A propulsive and chillingly prescient novel of suspense and terror from the Bram Stoker

award-winning author of The Cabin at the End of the World and A Head Full of Ghosts. “Absolutely riveting.” — Stephen King In a matter of weeks, Massachusetts has been overrun by an insidious rabies-like virus that is spread by saliva. But unlike rabies, the disease has a terrifyingly short incubation period of an hour or less. Those infected quickly lose their minds and are driven to bite and infect as many others as they can before they inevitably succumb. Hospitals are inundated with the sick and dying, and hysteria has taken hold. To try to limit its spread, the commonwealth is under quarantine and curfew. But society is breaking down and the government's emergency protocols are faltering. Dr. Ramola "Rams" Sherman, a soft-spoken pediatrician in her mid-thirties, receives a frantic phone call from Natalie, a friend who is eight months pregnant. Natalie's husband has been killed—viciously attacked by an infected neighbor—and in a failed attempt to save him, Natalie, too, was bitten. Natalie's only chance of survival is to get to a hospital as quickly as possible to receive a rabies vaccine. The clock is ticking for her and for her unborn child. Natalie's fight for life becomes a desperate odyssey as she and Rams make their way through a hostile landscape filled with dangers beyond their worst nightmares—terrifying, strange, and sometimes deadly challenges that push them to the brink. Paul Tremblay once again demonstrates his mastery in this chilling and all-too-plausible novel that will leave readers racing through the pages . . . and shake them to their core.

Learning with Information Systems Simon Bell 2013-02-01 In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

Spatial Variation of Seismic Ground Motions Aspasia Zerva 2016-04-19 The spatial variation of seismic ground motions denotes the differences in the seismic time histories at various locations on the ground surface. This text focuses on the spatial variability of the motions that is caused by the propagation of the waveforms from the earthquake source through the earth strata to the ground surface, and it brings together the various aspects underlying this complicated phenomenon. Topics covered include: Evaluation of the spatial variability from seismic data recorded at dense instrument arrays by means of signal processing techniques Presentation of the most widely used parametric coherency models, along with brief descriptions of their derivation Illustration of the causes underlying the spatial variation of the motions and its physical interpretation Estimation of seismic ground-surface strains from single station data, spatial array records, and analytical methods Introduction of the concept of random vibrations as applied to discrete-parameter and continuous structural systems on multiple supports Generation of simulations and conditional simulations of spatially variable seismic ground motions Overview of the effects of the spatial variability of seismic motions on the response of long structures, such as pipelines, bridges and dams, with brief descriptions of select seismic codes that incorporate spatial variability issues in their design recommendations This book may serve as a tutorial and/or reference for graduate students, researchers and practicing engineers interested in advancing the current state of knowledge in the analysis and modeling of the spatial variation of the seismic ground motions, or utilizing spatially variable excitations in the seismic response evaluation of long structures.

The Maghrib in the Mashriq Maribel Fierro 2021-01-18 This is a pioneering book about the impact that knowledge produced in the Maghrib (Islamic North Africa and al-Andalus = Muslim Iberia) had on the rest of the Islamic world. It presents results achieved in the Research Project "Local contexts and global dynamics: al-Andalus and the Maghrib in the Islamic East (AMOI)", funded by the Spanish Ministry of Science, Innovation and Universities (FFI2016-78878-R AEI/FEDER, UE) and directed by Maribel Fierro and Mayte Penelas. The book contains 18 contributions written by senior and junior scholars from different institutions all over the world. It is divided into five sections dealing with how knowledge produced in the Maghrib was integrated in the Mashriq starting with the emergence and construction of the concept 'Maghrib' (sections 1 and 2); how travel allowed the reception in the Maghrib of knowledge produced in the Mashriq but also the transmission of locally produced knowledge outside the Maghrib, and the different ways in which such transmission took place (sections 3 and 4), and how the Maghribis who stayed or settled in the Mashriq manifested their identity (section 5). The book will be of interest not only for those whose research concentrates on the Maghrib but more generally for those who want to understand the complex and shifting dynamics between 'centres' and 'peripheries' as regards intellectual production and circulation.

Radar Instruction Manual United States. Maritime Administration 2005 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs
